HAWAII CHAPTER
U.S. GREEN BUILDING COUNCIL

About the Instructor- John Bendon- Green Building LLC

John Bendon is a leader in Hawaii in the field of green building and energy efficiency. John was the LEED Accredited Professional who managed Maui's first commercial LEED New Construction project, inspected and tested all of Maui's certified LEED for Homes projects, and has worked on LEED EBOM and LEED ND projects in Hawaii. John has taught classes at the University of Hawaii Maui College outreach program on green building and energy efficiency and is a frequent speaker at green building forums and expos. As an instructor, John has the ability to break down complex topics in a way that students can understand and learn.

John Bendon is a LEED Accredited Professional with a specialty in LEED Homes. He is also Certified Energy Rater under RESNET, a Building Performance Institute Analyst, and holds a B.A. in Environmental Studies from the University of Colorado. To learn more about John and his company Green Building LLC, please visit www.GreenBuildingHawaii.com

Proven Results- (Some quotes from our partner's classes)

"Thanks to John and Alex, I passed the LEED Green Associate exam within one week of attending their exam prep workshop. Their handouts and practice exams focused my attention on key areas to study and memorize. Great return on investment!"

Kim Evans, Hiialoakua papa Sustainable Marketplace of the Pacific

"Our five staffers that took your class have all taken the exam and passed. We are 5 for 5. As the leader of our company, I knew the day was well worth the investment when we finished up. But the results speak for themselves. We can't wait to get our feet wet in real world applications. Thanks again for helping our staff down the path of accreditation."

- P. Verdicchio, LEED AP, SEC Planning

"I just took the exam and passed with a score of 181! As an architect and attorney, I'm a veteran of many licensing exams and associated prep classes. I must tell you, your course is one of the very best I've taken. It was very concise and well focused, with great exam-specific content. I was able to prepare effectively solely from the materials you provided. I would heartily recommend your course to anyone hoping to obtain a passing score. Many thanks."

- R. Reiss, esq. AIA NCARB LEED AP

"I amazed myself by passing the LEED exam with a 182 the day after having taken your workshop. My sense of confidence and the ability to pass with such a high score can only be attributed to having taken your exam preparation course. Thank you for giving such a valuable workshop."

- R. Joe, CSBA, LEED AP, Sustainable Contra Costa County
